The speed for paraphrase function is really slow...

1. Can not found the place for translation module; 2. Close/add note is too much, click other place to close the toolet; 3. Note can add default content like the translation 4. save button can be multi-clicked for the same words, it's better to save differently for words, sentenses and phrase 5. globel settign page can be slipt into different pages

使用很方便，超完美！！

It is quite non-user-friendly to put everything in the right-click menu. Users must repeatedly highlight paragraphs and move their mouse down to select the translation. The addition of paraphrase translation is quite innovative, and I can see its usefulness in understanding complex words and phrases. Overall a functional translation plugin. Although far from those top-notch tech company products, it can do its job.

Awesome work! Though its not user-friendly (for me), it still helps me with some translation.

same as before

翻译插件很棒，平时阅读L2文章时可以提供快捷且相对准确的翻译，能够提供很大的帮助。
